1	Fundamentals of electromagnetic Waves, Transverse Electromagnetic Waves, Power density, Electromagnetic field intensity. Radiation and Reception, Polarization. Attenuation and Absorption, Effects of Environment, Reflection and Fading of waves refraction of waves. Propagation of Waves, The Electromagnetic Spectrum, Ground Wave, Space Wave, Sky wave, Field strength at a distance. Sky wave Propagation, The ionosphere and its effect, Terms and definitions (i) the virtual height of ionosphere variations.
2	Fundamentals of electromagnetic Waves, Transverse Electromagnetic Waves, Power density, Electromagnetic field intensity. Radiation and Reception, Polarization. Attenuation and Absorption, Effects of Environment, Reflection and Fading of waves refraction of waves. Propagation of Waves, The Electromagnetic Spectrum, Ground Wave, Space Wave, Sky wave, Field strength at a distance. Sky wave Propagation, The ionosphere and its effect, Terms and definitions (i) the virtual height of ionosphere variations.
3	Fundamentals of electromagnetic Waves, Transverse Electromagnetic Waves, Power density, Electromagnetic field intensity. Radiation and Reception, Polarization. Attenuation and Absorption, Effects of Environment, Reflection and Fading of waves refraction of waves. Propagation of Waves, The Electromagnetic Spectrum, Ground Wave, Space Wave, Sky wave, Field strength at a distance. Sky wave Propagation, The ionosphere and its effect, Terms and definitions (i) the virtual height of ionosphere variations.
4	Fundamentals of electromagnetic Waves, Transverse Electromagnetic Waves, Power density, Electromagnetic field intensity. Radiation and Reception, Polarization. Attenuation and Absorption, Effects of Environment, Reflection and Fading of waves refraction of waves. Propagation of Waves, The Electromagnetic Spectrum, Ground Wave, Space Wave, Sky wave, Field strength at a distance. Sky wave Propagation, The ionosphere and its effect, Terms and definitions (i) the

	virtual height of ionosphere variations.
5	Space waves. Radio horizon, Superrefraction in atmospheric duct.(ducting) ANTENNAS: The Radiation Mechanism Elementary Doubelt, Plane of the doublet Pattern cross Section in Plane perpendicular to doublet, Wire radiators in space. Current and Voltage Distributions, Resonant Antennas. Nonersonant Antennas, Terms and Definitions (i) Antenna Gain (ii) Directive Gain (iii) Directivity and Power Gain, Antenna Resistance
6	Space waves. Radio horizon, Superrefraction in atmospheric duct.(ducting) ANTENNAS: The Radiation Mechanism Elementary Doubelt, Plane of the doublet Pattern cross Section in Plane perpendicular to doublet, Wire radiators in space. Current and Voltage Distributions, Resonant Antennas. Nonersonant Antennas, Terms and Definitions (i) Antenna Gain (ii) Directive Gain (iii) Directivity and Power Gain, Antenna Resistance
7	Space waves. Radio horizon, Superrefraction in atmospheric duct.(ducting) ANTENNAS: The Radiation Mechanism Elementary Doubelt, Plane of the doublet Pattern cross Section in Plane perpendicular to doublet, Wire radiators in space. Current and Voltage Distributions, Resonant Antennas. Nonersonant Antennas, Terms and Definitions (i) Antenna Gain (ii) Directive Gain (iii) Directivity and Power Gain, Antenna Resistance
8	Space waves. Radio horizon, Superrefraction in atmospheric duct.(ducting) ANTENNAS: The Radiation Mechanism Elementary Doubelt, Plane of the doublet Pattern cross Section in Plane perpendicular to doublet, Wire radiators in space. Current and Voltage Distributions, Resonant Antennas. Nonersonant Antennas, Terms and Definitions (i) Antenna Gain (ii) Directive Gain (iii) Directivity and Power Gain, Antenna Resistance
9	Bandwith, Beamwith and Polarization, Ungrounded Antennas. Grounded Antennas Voltage and current distribution on Basic Marconi Antenna. Grounding Systems, Effects of Antenna Height , Optimum length, Effective length. Dipole Arrays, Parasitic elements , Broad-Side Arrays, End-fire array, Folded Dipole

	and applications. The Yagi –Uda Antenna, Rhombic Antenna and Radiation Patterns.
10	Bandwith, Beamwith and Polarization, Ungrounded Antennas. Grounded Antennas Voltage and current distribution on Basic Marconi Antenna. Grounding Systems, Effects of Antenna Height , Optimum length, Effective length. Dipole Arrays, Parasitic elements , Broad-Side Arrays, End-fire array, Folded Dipole and applications. The Yagi –Uda Antenna, Rhombic Antenna and Radiation Patterns.
11	Bandwith, Beamwith and Polarization, Ungrounded Antennas. Grounded Antennas Voltage and current distribution on Basic Marconi Antenna. Grounding Systems, Effects of Antenna Height , Optimum length, Effective length. Dipole Arrays, Parasitic elements , Broad-Side Arrays, End-fire array, Folded Dipole and applications. The Yagi –Uda Antenna, Rhombic Antenna and Radiation Patterns.
12	Bandwith, Beamwith and Polarization, Ungrounded Antennas. Grounded Antennas Voltage and current distribution on Basic Marconi Antenna. Grounding Systems, Effects of Antenna Height , Optimum length, Effective length. Dipole Arrays, Parasitic elements , Broad-Side Arrays, End-fire array, Folded Dipole and applications. The Yagi –Uda Antenna, Rhombic Antenna and Radiation Patterns.
13	UHF and Microwave Antenna: Antenna with Parabolic Reflectors: Properties of Paraboloid Feed Mechanisms of paraboloied Antennas. Lens Antennas, Principle of Working Helical Antenna, Loop Antenna.
14	UHF and Microwave Antenna: Antenna with Parabolic Reflectors: Properties of Paraboloid Feed Mechanisms of paraboloied Antennas. Lens Antennas, Principle of Working Helical Antenna, Loop Antenna.
15	UHF and Microwave Antenna: Antenna with Parabolic Reflectors: Properties of

	Paraboloid Feed Mechanisms of paraboloied Antennas. Lens Antennas, Principle of Working Helical Antenna, Loop Antenna.
16	UHF and Microwave Antenna: Antenna with Parabolic Reflectors: Properties of Paraboloid Feed Mechanisms of paraboloied Antennas. Lens Antennas, Principle of Working Helical Antenna, Loop Antenna.
